Discuss

Con Concept

Inputs

Files

We can store fixed control records only on program test program master disk. Separate disk unit control notice keyed in for pick up of data to compute

All inputs are punched data -

1-3 + ASD-1 SU-#0 % obtainable

Edit - control w/c

+ Edit of I. in relation to Photo Print

) print and compat with finder

program will read Hash Key

Form Depredation - on photo readout -

Possible would be what would pick up

Et as why not limit to recovery phase

Use of system I. Status as R&D test

and Dozen possible HIL entering

[redacted]

Restriction on own flight [redacted] and with SAC

WX facts? Close - Would permit collection? Enough - Corona flew over (two) angle - Cloud cover. Based on limited study

Kick around table - keep S still volunteering that screwy Gerry is [redacted] figuratively speaking

NSD-1 - ALD-3 - get back panel

[redacted] may go to Sec Def or maybe to USIB for action

4 commands - ADC, AFNT CStaff, AF Technical Applications, NSA, Sec Serv, Dnt Comm, NIRO center - AF and Central - Warning center Pentagon - [redacted] also has duplicates

SAC also

Extent of activity - [redacted] - who gives instructions

[redacted] also duplicates

[redacted]

After SAC visit - Ld SAC [redacted] go!
Computer & minicard - Computer
for short trajectory problems & time
limit for computer runs go in
trembling with matters. This
may negate requirement to [redacted]
SAC investigate CIA - mandate
to make compatible if possible
CIA may intend to build.

Other systems - J-58 - J-93 F4

Langley - Bureau Office of Rep.
Could resolve problems of U-2 type.
Plan to Ops? Why not a USRO in
ARDC. Just because of classified no
reason to be in USAF.
↑??

Gen Erskine possibly may get response
Lead from arguments to get up there & Ops
Hq did. SMITH to get back, type of
print etc - ancillary flight & handling problems
U-2 R U-2 Plan + Ltr. Complete down to last

26 Oct

1. Formal Program Review
Bowley had requested BMD for
formal review previously. M.d Nov

System F, System I - Recovery -
and some other areas where
appears to be gap - also new
collection methods being handled

Billings lets have program review.
Art Prepare memo - York to
see A.F. - or Chmn. -
to be given to Your Staff -
What Dir Billings want -
Include list of questions to be answered.

Then after this (Program Review)
Executive Sessions

(1) and LeMay — Billings
(1) Wilson — Bissell
Yorc — Land
(Schriever) — Chmn IC

General Wilson

Memorandum For Assistant Secretary of the Air Force
(Research and Development)
Subject: SAMOS Program Review

1/ Information has been received in this office to the effect that the Air Force Ballistic Missiles Division has been requested by AFDAT to prepare a program review briefing to be presented at Headquarters, USAF, in mid-November. It is felt that there is most timely coincidence because on the 20th Oct this office was requested by higher authority to conduct a SAMOS Program Review.

2 It is requested that the USAF make arrangements, through the Asst Secretary R&E for Special Projects, to present the briefing to appropriate members of my staff. In addition, information concerning the following should be included:

a) Total Program costs and individual sub-system costs to include

yearly budgets for maintenance and operations, facilities, number of personnel etc.

b. A firm statement of the operational requirement for the type and amount of photographic and telephone coverage. This to include; the number of devices envisaged for specific time periods, linear mileage of photographic coverage obtainable per day based on a 12°-15° sun angle and climatologic studies pertaining to the four seasons of and priority areas of interest, airborne and ground electronic collection devices in operation and under development.

c. A firm statement of the operational requirement for System I. This should include the advantages and disadvantages of a recoverable and non recoverable package, Communications degradation expected on the various phases of transmission and reproduction,

the need for immediate viewing, the utilization of the end result (pertaining to target ~~materials, en route materials~~, ~~damage~~ buffing aids, warning indications etc), differences in T O & E and facilities.

3 Present Plans are to hold an executive session after the briefing with attendance limited to a minimum number of key personnel. The purpose of this session will be to examine the future of the actual program and to formulate timely policy guidance which is required for efficient management and effective operations. In addition to yourself, recommended personnel to attend this session are:

~~B~~ General White

Alternates (one to attend if primary member is unavailable)

General LeMay

General Montgomery
